

Log of changes: Identifying Cool Food Meals (Technical Note)

June 10, 2022

Richard Waite and Jessica Zionts

- Added Cool Food Meals maximum GHG thresholds for Latin America and Oceania (both high meat consuming regions) and updated the thresholds for Europe and North America using the latest FAOSTAT consumption data for 2015 (expansion of Table 1 in the technical note PDF)
- Published the calculations for the thresholds for the 4 regions (Europe, Latin America, North America, Oceania) – see Cool Food calculators for each region
- Deleted the organizational eligibility criteria in the original (2020) Cool Food Meals technical note, including removing mention of Cool Food “Heroes,” a designation that has been discontinued
